## IKO Mach Two New Product Range

Brown - 62191526  
Black - 62191524  
Green - 62191522

IKO Mach Two is an SBS modified bitumen single ply waterproofing membrane with a polyester carrier. It has an upper surface finish of mineral and a fleece finish to the underside, for use as either a partially bonded system using a specified IKO polyurethane adhesive, or as a mechanically-fastened system.

The product must be applied by an IKO trained and assessed Approved Installer, working for a registered IKO Approved Contractor in the IKO Mach Two system. All work must be undertaken in accordance with the requirements of the specific information given with the IKO Specification document.
