IKOpro High Bond Primer

Technical Data Sheet – Section 18.80

PRODUCT INFORMATION

IKOpro High Bond Primer is a modified rubber water-based primer, used to prepare concrete, brickwork, blockwork, metal and GRP surfaces prior to the direct application of mastic asphalt.

Product Code:	23170005
Appearance:	Orange Liquid
Size:	5 Litres
Application Rates:	Up to 5 m^2/Litre (dependent on surface)
Drying Time:	Typically 1 Hour
Shelf Life:	6 Months @5-25°C
Cleaner:	Soapy water when wet

INSTALLATION

PREPARATION

Ensure surfaces are clean, dry and free from debris, grease, fungal growth and any other contaminants. In addition, mould oil and excessive surface laitance should be removed by wire brushing or light scabbling prior to applying IKOpro High Bond Primer.

APPLICATION

IKOpro High Bond Primer should be applied at temperatures between 5°C and 25°C.
Do not thin the material for any reason.
The primer should be applied to the prepared surface by brush or roller to give a uniform, even coating. Where necessary, a brush should be used to ensure the primer is applied fully into corners and areas of detailing.
Particularly porous surfaces may require an additional full coat of the product but be aware that over application of the product may result in longer drying times.
Drying time is typically 1 hour dependent on ambient temperature and porosity of the substrate.

POST COMPLETION

The mastic asphalt should be applied as soon as practicable after the primer is dry.
If the surface of the application becomes damaged or contaminated, the surface must be swept clean and IKOpro High Bond Primer reapplied in accordance with the application section above.

Information regarding disposal of empty containers or containers with residual liquid can be found within the relevant sections of the IKO Safety Data Sheet.

OTHER RELEVENT DOCUMENTATION

Where applicable, Material Safety Data Sheets (MSDS), Declaration of Performances (DoPs), and Third-Party Accreditations are available to view and download from the IKO website Resource Centre:

COMPANY ACCREDITATIONS

IKO PLC, a roofing, waterproofing, and insulation company, holds various accreditations that demonstrate its commitment to quality, safety, and environmental responsibility. These include ISO certifications for quality management and occupational health and safety, British Board of Agrément (BBA) accreditations for specific products and systems, and Factory Mutual (FM) approval for certain roofing systems.

All our manufacturing plants have BS EN ISO 9001, BS EN ISO 14001, BS EN ISO 45001, BES 6001, and PAS 2080 accreditation, meaning we match the quality and sustainability requirements and use responsibly sourced raw materials in our production. We also re-use by-products from manufacture, wrap products in minimal packaging, and we employ a streamlined transportation network.

IKO is also a leading member of all relevant trade associations such as NFRC, BFRA, SPRA, LRWA, MAC, RSTA, BJA and LCRIG having technical experts within the technical and standards committees to help us get informed first-hand about recent updates on technical requirements for the design and installation of roofing, waterproofing, road and bridge maintenance industry products.

DISCLAIMER

Whilst every precaution is taken to ensure that the information given in this literature is correct and up-to-date it is not intended to form part of any contract or give rise to any collateral liability, which is hereby specifically excluded.

IKO reserves the right to amend and/or withdraw this document without notice.

Intending purchasers of our materials should therefore verify with the company whether any changes in our specification, application details, withdrawals or otherwise have taken place since this literature was published.
