

ARMOURPLAN SG

PRODUCT INFORMATION

A glass tissue reinforced polyester fleece-backed PVC single ply roofing membrane.
Used in a wide range of roofing applications on both flat and sloping roofs.
Suitable for both new build and refurbishment installations, including specialist applications such as simulated metal roofs.
Can be adhered onto most common substrates using Spectrabond Low Foaming PU adhesive or IKOpro Sprayfast FMA adhesive.
Forms a sleek finish.

Description	Fleece-Backed Membrane
Thickness	1.2mm
Width	2.12m
Length	20m
Colour	Mid Grey (nearest RAL 7046) Slate Grey (nearest RAL 7015)
Material	PVC-P
Reinforcement	Glass tissue
Fleece Backing	120gsm non-woven polyester
Product Code	44021212 – Mid Grey 1.2mm 46121212 – Slate Grey 1.2mm

FEATURES & BENEFITS

- BBA Certified 05/4287
- Good UV resistance and durability
- Good mechanical properties and product performance
- Efficient and safe installation
- Secure seam welding quality
- Aesthetically pleasing finish
- Complete range of fixings and accessories available

SPECIFICATION

To complete the installation of Armourplan SG, the system includes a wide range of accessories, including detailing and walkway membrane cover strips, preformed corners and outlets, standing seam profile pre-coated metal sheet for forming edge details, IKOfix fastening systems and termination bars, insulation and vapour control layers, adhesives, cleaners, sealants and roof lights.

INDEPENDENT ACCREDITATION

- BBA Agrément Certificate No. 05/4287
- CE Marked
- Euro Agrément Procedure
- UBAtc ATG (No. 12/2877)
- SGS / CTG (No. 629)
- Manufactured in accordance with BS EN ISO 14001, ISO 9001 & BES6001

DESIGN CONSIDERATIONS

CONFIGURATION

Before use thoroughly stir the Spectrabond Low Foaming PU Adhesive. Replace the container lid when work is interrupted. If required warm the Spectrabond PU Adhesive container in warm water.

Unroll the Armourplan SG over the prepared substrate and fold back approximately half its length.

Apply a coat of Spectra bond Low Foaming PU adhesive using a roller or apply Spray fast FMA adhesive to the substrate surface, priming only the area of roof where the membrane will be laid. *Note: The PU adhesive must be given time to activate prior to applying the membrane.*

On activation i.e. the point at which the adhesive will afford the highest bond strength, the surface of the adhesive starts to change from pink/red to opaque.

Carefully roll the Armourplan SG into the primed surface.

Fold back other half of the roll of Armourplan SG and repeat the procedure.

Roll with water filled roller or soft bristled broom to ensure intimate contact between the two surfaces.

Unroll the next roll of Armourplan SG, ensuring the end laps are staggered and the side overlaps the previously installed sheet by 60mm.

Repeat the adhering process.

Fully hot air welds the 60mm side lap and allow to cool completely.

Mechanically check the integrity of the cooled weld by running a seam probe or 4mm wide screwdriver (with rounded edges) along the seam applying pressure into the seam.

TYPICAL PROPERTIES

Characteristic properties	Unit	Method	SG120	SG150
Thickness +10%/- 5%	mm	EN 1849-2	1.20	1.50
Length +1%/- 0.5%	m	EN 1848-2	20.00
