

Spectraplan SM TPE

Single-Ply Membrane

Product Code: 52621212

Reinforcement: Polyester Scrim

Thickness: 1.2mm

Colour: White

Roll Sizes & Area Coverage:

2.12m x 20m = 42.4m²

Rolls Per Pallet: 8

[BBA Agrément Certificate 05/4203](#)

Spectraplan SM is a thermoplastic elastomer (TPE) membrane suitable for mechanically fastened systems on a wide range of roofing applications. Spectraplan boasts a range of sustainability and workmanship benefits in comparison to traditional single ply roofing materials.

Key Features:

- Free from plasticisers, (H)CFC's, halogens
- High solar reflectivity reducing urban heat island effect
- Wide welding window ensures secure seam welding
- High UV resistance and a long service life.
- Homogeneous compound offering excellent impact resistance, tensile strength and elasticity
- Cost-effective roofing systems only installed by approved and trained contractors.
